Education

Krishna Engineering College

B.Tech (C.S.E) [Grade: 8.8 SGPA]

June. 2019 – May 2023

Ghaziabad,U.P.

Andhra Educational Society, ITO

Intermediate [Grade: 72 %]

June. 2017 – May 2019

ITO, New Delhi

Diwakar Model School

High School [Grade: 9.2 CGPA]

June. 2016 – May 2017

Sahibabad, U.P.

Technical Skills

Programming: C++, JavaScript, Java

Tech - Frontend / Backend : React.js (basic) , Node.js, Express.js

Databases / Cloud: SQL, MongoDB , Firebase , AWS , GCP

Tools: GitHub, Git, Postman

Work Experience

Frecher Hinakins

Junior Software Engineer

Jan 2023 – Ongoing

Noida, U.P

- Developing RESTful APIs for various services, ranging from student creation to fee payment.
- Implemented microservices architecture using Node.js and Express, improving API response time by 45% and reducing server load by 30%.
- Developed multiple cron jobs to schedule alerts for products across various services, such as subscription payments, birthdays, and other important events.
- Using Joi validation for API definitions, helps to reduce erroneous API calls to the database.
- Working on data scrapers to generate price recommendations for a car rental website.
- Optimized MongoDB database queries, reducing page load times by 15% and enhancing overall application performance.

XPERIA3D - IITD

MERN Intern

Sept 2022 – Nov 2022

IIT Delhi , New Delhi

- Assign tasks and provide a (KT) session for the product to the new intern.
- Worked with Google Firebase to manage user login and product component data.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Developed multiple pages such as the Profile, Cart, and Particular Product Page according to the Figma Wireframe.

Projects

React-Movie | ReactJs, NodeJs, Tailwind CSS

Nov 2022

- This project uses TMDB Api to display movie details.
- Utilizes the Styled-Components approach for styling CSS in React.js.
- The NodeJs filter service is utilized to filter specific data according to search criteria.

Book Management API | NodeJs, Express, MongoDB

Dec 2022

- Utilize the Public Book API to retrieve details about books..
- Utilized various APIs to retrieve book data based on parameters such as book number, author name, publication, and more.
- Utilize various Node.js libraries such as jsontocsv to convert JSON data of books to CSV format, specifying particular fields.
